

# Senior C++ Developer

(Up to £70,000 depending on experience)

## ***What you'll do***

You will be working within our payments team, who look after our enterprise software, developing projects ranging from our main EPOS Solution, Mobile Applications to our Chip & PIN integrated payment system.

You will help to modernise the hospitality industry by working on the latest features and improvements for these applications. You'll feel a sense of pride when you see the work you do having a direct positive impact across the hospitality industry.

Your day will be split between preparing for upcoming development, peer reviews, work estimation, execution, and involvement in continuous improvement.

Working within an agile delivery team, you will participate in all aspects of delivering software projects. You'll be part of the product design, technical design, development, and maintenance of our environments. You will ensure quality by performing reviews and influencing behaviour-driven design.

## ***Main Duties & Responsibilities***

Working within an agile delivery team, you will participate in all aspects of delivering software projects. You'll be part of the product design, technical design, development, and maintenance of our environments. You will ensure quality by performing reviews and influencing behaviour-driven design.

You will enjoy a fast-paced development environment where the next phase is only around the corner. You will care about continuous improvement and modernising our approaches.

## ***Who you are***

A key aspect of your job role will involve working with modern coding, unit testing, debugging, and code review techniques.

- Extensive experience (4 -5 years) developing with C#.
- Have good working experience working with SQL.
- You'll have experience integrating systems with rich, complex, real-time third-party APIs.
- Provide feedback from support channels into product design.
- Develop and maintain build and deployment pipelines.
- Participate in product and technical designs to ensure that team delivers value in each increment.
- Performing code reviews to ensure that all code follows agreed standards,

Actively looking for and suggesting improvements in our processes

***Additionally, the following skill areas would be advantageous:***

- WCF/SOAP
- ASP .NET Core
- REST API's/JSON
- Azure Dev Ops
- Azure cloud dev experience
- Postman
- Desktop application installer experience

***We are going on an exciting journey and need more like-minded travellers to help us get there!***
