Junior / Mid-level C++ Developer
(£28,000 - £55,000 DOE)

A well-established software company that develops cutting-edge software for highly desirable consumer electronics products is looking for a C++ Software Engineer, with 2023 set to be a record breaking year.

We are looking for a Junior or Mid-level Software Engineer with a passion for using C++ to join their dynamic and engineer focussed team. You'll ideally be someone who is excited by tricky and challenging problems and be interested in becoming an expert with C++ over time. There is direct mentorship by Senior / Lead C++ Engineers and it's a collaborative team working hybrid in Bristol.

C++ Junior / Mid-level Software Engineer Responsibilities:

- Collaborate with a team of developers to design and develop software solutions that meet customer requirements
- Write clean, efficient, and reusable code in C++
- Participate in code reviews and maintain code quality standards
- Contribute to the testing and debugging of C++ software
- Continuously learn and improve technical skills

C++ Junior / Mid-level Software Engineer Requirements:
- Good understanding of C++ 11 / 14 / 17 / 20 programming language
- Familiarity with Linux, TCP/IP, UDP, Python, Multithreading, and CMake is a plus
- Good problem solving and analytical skills
- Ability to work collaboratively in a team environment
- Good communication and interpersonal skills
- Bachelor's degree in Computer Science or related field

If you are passionate about C++ and have a desire to work on software products used by millions across the globe, we encourage you to apply to book in an interview slot. Multiple roles available at Graduate level or more at a more experienced level too
