Senior Automation Tester
(Up to £70,000 depending on experience)

What you'll do

You will help and shape the automated testing of the software products and platform capabilities. You will be the Test Automation domain specialist within your squad, providing the team with the necessary skills and knowledgebase to help ensure that our automation tests and frameworks provide us with the best return of investment we can get.

Responsibilities will involve: -

- Adding tests to our existing Test Automation framework, working alongside fellow Test Engineers to ensure that just the right tests are automated.
- Evaluating tools and processes to help maintain and improve the automation tests and our frameworks to ensure time spent doing manual regression is kept a minimum.
- Creating and maintaining test data across various environmental permutations.
- Help and mentor fellow Test Engineers within the Automation domain.
- Working alongside our Technical Services team to create and maintain Automation Environments.
- Performing some manual testing.

Who you are

- You have strong C# knowledge
- Experience with implementing automation frameworks from scratch
- Experience with integrating automation with CI/CD pipelines
- Azure Dev Ops (TFS)
- Cross Browser & Mobile device automation
- Git Version Control
- You have 5 + years' experience working with and testing web API's using tools such as Swagger and Postman
- You take the lead on suggesting and implementing improvements to current test automation processes
- You have experience in performing peer reviews and coaching team members in following best practices.
- You have experience in creating test cases with Selenium WebDriver based frameworks.
- You have an excellent understanding of SDLC's and where Test Automation can be of most benefit to both the team and the overall product quality.
- You actively engage in the Test Automation community collating new ideas, tools, and processes to ensure that the status quo is always challenged.

- Willingness to help the team with testing at all levels when required to ensure team goals and objectives are met.

What we value

Passion, Teamwork, Innovation and Professionalism are the values we believe make us the company we are. We're looking for someone who understands great culture and will help us shape it as it evolves.
